

UMARYA Hospital Supplies

About Us

UMARYA is an innovative medical technology company that started its venture in 1991 in a 150 square meter area and has now expanded to modern production facilities totaling 6,500 square meters, holding a strong position in both domestic and global markets.

Since our inception, we have been working with an understanding that aims to add value to the healthcare sector; we base our principles on quality in production, reliability in service, and sustainability in processes. Starting with limited resources, we have solidified our place in the sector as a reliable solution partner producing to international standards.

Our Production Power

With our advanced machinery infrastructure, cutting-edge production technologies, and experienced engineering staff, we produce the products needed by the medical sector with high precision and reliability. Our production processes are planned in accordance with Good Manufacturing Practices (GMP) standards; each product is meticulously tested by our quality control units.

UMARYA has succeeded in becoming a manufacturer that makes a difference by offering not only standard products but also specialized medical solutions needed in the sector. We bring many products that are limited in access in Turkey or are generally imported into domestic production with an innovative approach; we provide added value to the healthcare sector.

Our Global Vision

Today, we export not only to healthcare institutions all over Turkey, but also to dozens of countries, primarily in Europe, Asia, the Middle East, and Africa. This global network is a result of UMARYA's business approach based on quality and trust.

Every new country, every new collaboration means not only a commercial success for us, but also a responsibility to contribute to human health. While growing in the global market, we focus on developing solutions that consider cultural sensitivities and are suitable for local needs.

R&D and Innovation

Our R&D unit closely monitors developments in healthcare technologies and constantly focuses on developing new products and improving existing ones. All our products are designed with a scientific basis, user-oriented and innovative perspective; they offer effective solutions to the daily needs of hospitals, clinics and home care professionals.

Quality and Customer Satisfaction

UMARYA sees quality not just as a result; We view quality as an integral part of all processes. Our Quality Management System is structured in accordance with national and international standards and is supported by the principle of continuous improvement at every stage.

Customer satisfaction is at the core of our business model. We aim to establish long-term business partnerships with all our customers and to ensure unconditional satisfaction through the support we provide before and after sales.
